

Do you need a fast-track introduction to Life-Cycle Assessment?

So you can make an impact
in your business or organisation...

life-cycle assessment
Accelerator Workshop

Royal Academy
of Engineering

Enterprise
Hub

Then join us for our 1 day life-cycle assessment accelerator workshop.

Tuesday 16th September, in person
at the Royal Academy of Engineering's
Enterprise Hub, Newcastle.

You'll gain the knowledge and skills that enable you to:

- 1** Understand LCA in the context of sustainability
- 2** Qualitatively analyse the whole life-cycle of products
- 3** Familiarise with the methodology used to perform LCA
- 4** Identify a range of software options to perform LCA
- 5** Map LCA to your organisation and activities

As a result we hope
you'll make an
impact by:

Connecting LCA to
business practices and
innovation opportunities.

Communicating LCA to
colleagues effectively.

Considering the whole
life cycle of a product to
help you develop more
sustainable products.

Core Concepts Covered:

Whole life-cycle thinking.

Methodology for assessing environmental sustainability.

Practical, easy-to-follow examples to experience LCA firsthand.

Suitable for professionals across sectors (e.g. consumer products, local government) and relevant for both SMEs and multinational companies.

The cost of the workshop is £275 + VAT.
To book a space, please complete the registration form at this link below.
